

Dear Sirs:

I have several concerns that I would like the TIP management team to address:

- Remove road access points. Replant roads for a quick return to nature following logging activities.
- Close access to gated areas from May 1 to October 30.
- Plan so that roads required for industrial purposes do not interfere with canoe routes.
- Protect all the Nastawgan routes shown on Craig MacDonald's, "Historical Map of Temagami", with 300m buffers on each side of the trails and waterways and co-operate with neighbouring districts to do so.
- Close the Liskeard Lumber road in the Lady Evelyn Smoothwater Wilderness Class Park at Gamble Lake and remove the two bridges crossing the Lady Evelyn River.
- Protect all heritage sites with 500 metre buffers.
- Ban all motorized travel in these parks: Lady Evelyn Smoothwater Wilderness, Sturgeon River, Obabika River and Solace.
- Maintain existing access controls and motorized restrictions on Obabika Lake.
- Formulate a Temagami Recreation Management Area plan to include the historical canoe routes on Crown lands and Conservation Reserves. Collect fees from all Crown land users, canoers, hikers, boaters, campers, hunters, anglers, snowmobilers and ATV enthusiasts. Apply the money to the development, support and maintenance of the recreational trails, waterways, portages and campsites.

Thank you for the opportunity to contribute.

Yours truly,
